PUBLIC COMMENT NEEDED

Submit your comments on the Solid Waste Management Plan next Monday, March 27, 6-7:30pm. Here's the link to sign up to register to attend, read over the draft of the plan, and to provide comments on the online document, as well.

<https://publicworks.baltimorecity.gov/pw-bureaus/solid-waste/plan>

We'll be advocating for the deconstruction mandate recommendations, specifically the local policy we've been organizing for, the REBUILD Act, as well as, for an emergency contingency plan in the case of a sudden breakdown or fire of Baltimore's incinerator. Due to the age of our incinerator, the chances of a sudden disaster are probable, especially after the recent fire of the incinerator operated in Doral, FL.

You can also participate in the Climate Action Plan Workshops, and get paid to do it, too!

There are 2 remaining events to participate, coming up in April. Register here:

CAMPAIGN LAUNCH

Great news! We have joined forces with the national effort, led by with [US Reduces](#), to launch the Baltimore Reduces campaign. We will be distributing stickers to local businesses to showcase their commitment to participation in the zero waste movement through Reuse and allowing for BYO; Meaning we all can participate in zero waste by bringing our own reusable containers, cups, utensils, etc. to participating businesses.

To make this happen, we need volunteers to help with outreach and with populating a local map with participating businesses and vendors. Join our team today!

Message info@cleanairbmore.org to get involved with this campaign!
