THRILLED TO BE WORKING ON ZERO WASTE WITH JHU!

Last fall, EJN's Clean Air Baltimore Coalition was accepted as a Community Based Organization with Johns Hopkin's SOURCE. Thanks to this partnership, we have a student volunteer helping us with our zero waste work. With their support, we started a free rent-a-mug station at the JFX Farmers Market and are in conversation to get them to adopt zero waste at the market!

During the course of the project, we're designing a zero waste accreditation system to provide resources to businesses that participate in the seasonal Sunday market. Keep an eye out for our zero waste station at the market, and elsewhere around town, and come say hi!

WHATS HAPPENING IN 2023

The Maryland legislative session is upon us. First day of session is next Wednesday, January 11, 2023 concluding on Tuesday April 11, 2023. Our legislators are hard at work for us during this time for 90 days straight.

We have 2 potential bills that will be introduced on our behalf this year, more to share as that develops, so stay tuned.

Reminder to create your MGA online account so that you can track bills and sign up to offer testimony on hearing dates. Here's the link to create your account:
